SUMMARY

Engineer with hands-on experience in Generative AI, intelligent automation, and cloud-based systems through internships and advanced projects. Delivered LLM-powered workflows, agent systems, and self-healing CI/CD pipelines that reduced manual operations and improved system reliability.

EDUCATION

Vellore Institute of Technology (VIT) 2022 – 2026
B.Tech – Computer Science Engineering (Health Informatics) (CGPA: 8.77)

PROFESSIONAL EXPERIENCE

Ilantus Services May 2025 – July 2025
Software Developer Intern Remote

- Architected an agentic AI-driven IAM and IGA solution using SailPoint IdentityIQ and n8n to streamline identity lifecycle management and enforce access governance policies.
- Designed and deployed an LLM-powered conversational interface for access requests, driving a **30% reduction** in manual support tickets and faster request resolution.
- Orchestrated Joiner-Mover-Leaver automation via SCIM APIs, improving accuracy and reducing manual intervention by **80%**.
- Engineered Playwright-based test automation for certification reviews and role mining, cutting audit cycle time by **50%**.

Google Cloud – Generative AI Virtual Intern Nov 2025 – Jan 2026
SmartBridge and SmartInternz (Google Cloud Program) Remote

- Completed beginner, intermediate, and advanced Generative AI learning paths on Google Cloud, earning multiple badges across **20+** hands-on LLM and RAG labs.
- Developed, evaluated, and optimized end-to-end Generative AI workflows on Google Cloud, improving automation accuracy and response relevance by **35%** through prompt engineering and embedding optimization.

PROJECTS UNDERTAKEN

Self-Healing CI/CD Agent Nov 2025 – Dec 2025

- Engineered a self-healing CI/CD agent with GitHub Webhooks and Actions to detect build failures, reducing manual pipeline intervention by **65%**.
- Implemented an *Observe → Reason → Act* control loop with LangGraph to analyze logs and remediate syntax, dependency, and test failures, resolving **70%+** of incidents without manual intervention.

AI Agent for Automated Assignment Evaluation Aug 2025 – Oct 2025

- Architected an automated evaluation system using Gemini LLM to assess 500+ submissions, reducing review turnaround time by **85%**.
- Integrated Google Classroom, Drive, and Sheets APIs to generate structured grading reports and performance analytics for instructors.

NeuroMan: Early Neurodiagnosis Tool Dec 2024 – Feb 2025

- Developed a Flask-based platform for early neurological assessment using machine learning models, improving accuracy by **18%**.
- Optimized MongoDB data pipelines to enable low-latency real-time inference and scalable analytics.

SKILLS

- Programming:** Python, Java, C/C++
- Databases:** MySQL, PostgreSQL (pgvector), MongoDB
- Machine Learning:** Model Development, Data Analysis, Scikit-learn, Pandas, NumPy, TensorFlow
- Frameworks:** Flask, Streamlit
- Identity & Automation:** SailPoint IdentityIQ, IAM/IGA, SCIM, Workflow Automation
- Tools:** Git, Docker, Playwright, n8n, REST APIs, Figma
- Languages:** English, Hindi, German (Beginner)

CERTIFICATIONS

Generative AI (Beginner-Advanced) – Google Cloud Skills Boost Dec 2025 – Jan 2026
Introduction to Generative AI – IBM SkillsBuild Oct 2025 – Nov 2025
AWS Certification Course – IntelliPaat Academy Aug 2025 – Sep 2025
Applied Machine Learning in Python – Coursera Nov 2023 – Jan 2024

EXTRA-CURRICULAR ACTIVITIES

Vice-President, Mozilla Firefox Club: Led a 50-member team, increasing participation by **40%**. Feb 2024 – July 2025
Health Hackathon – VIT Bhopal & Johns Hopkins Dec 2024 – Feb 2025
SolVIT Hackathon: Advanced to Round 3 with a full-stack solution. Dec 2024 – Feb 2025
Main Coordinator, Industry Conclave: Managed speaker coordination and hosted the valedictory session. July 2024 – Aug 2024
SIH 2024 Finalist (Smart India Hackathon) Aug 2024 – Oct 2024
